**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to a rolled covering material, classified in class 428, subclass 40.1.
  - II. Claims 16-20, drawn to a method for making a rolled roofing membrane, classified in class 427, subclass 207.1.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as via extruding the adhesive material onto the bottom surface of the web.
3. A telephone call was made to Daniel J. Bourque on August 28, 2002 and on September 10, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
